

5/20/01 Delmar, NY For immediate release.

KnowledgeXtensions, Inc. holds first e-learning Summit with three Japanese business partners in Albany NY.

KnowledgeXtensions, a pioneer in personalized e-learning, recently held a three day e-learning summit on April 9th, 10th, and 11th at the Desmond Conference Center in Albany, NY. In attendance were representatives from three Japanese corporations, who traveled to the summit for a demonstration and in depth discussion of the capabilities of KnowledgeXtensions' e-learning products.

The Japanese companies, Applied Knowledge and Digital Method of Yokohama, and Movenet of Osaka, in western Japan, will effectively cover both the eastern and western geographic markets in the country.

As a result of the collaboration, contracts with major Japanese companies are expected to be signed this year. KnowledgeXtensions will send its President/Chief Technology Officer, and Director of International Marketing to Tokyo in June.

According to the Japanese companies, they chose to collaborate with KX after learning of the company's products and multi-lingual capabilities at an e-learning trade show KX attended in Tokyo last year.

Masayuki Kojima, President of Applied Knowledge said, "We believe that KnowledgeXtensions' advanced adaptive learning environments, which provide effective knowledge transfer across cultural boundaries, are the first e-learning solutions totally applicable to the Japanese market."

At the seminar, KnowledgeXtensions also demonstrated a cutting-edge, wireless e-learning technology. Recognizing that Japan is one of the leading countries in wireless communications technology, KX was pleased by the enthusiastic reception it received from its demonstration.

"In welcoming our new partners to our corporate headquarters and conducting our first e-learning summit, we feel we have already begun to overcome cultural and language barriers," said David Geoghegan, KnowledgeXtensions' President & CEO. "Our new infrastructure delivers personalized instruction at an unequaled the corporate level, eliminating all traditional barriers to e-learning and e-training"

KnowledgeXtensions, Inc., located in NY's Capital Region, is a leader in the development of personalized instruction, and has created a strong track record in satisfying the needs of corporations across the enterprise. The KnowledgeXtensions' approach provides an e-learning infrastructure, allowing the end-user to easily develop and deploy adaptive e-learning at their organization with a true enterprise-wide solution.

The enhanced authoring, delivery and assessment features form the "total solution" demanded by today's organizations. Experienced in serving Fortune 500 companies, (including GE, IBM, PWC, PR NEWswire, DIEBOLD, NCR, AT&T, DELOITTE & TOUCHE, ANDERSEN CONSULTING, PRENTICE HALL, AMERICAN EXPRESS, and COMPAQ), KnowledgeXtensions is dedicated to applying the latest software advances to help realize the promise of on-line learning, and offers a full-range of products and services dedicated to insuring the success of a client's e-learning effort. They provide a turn-key approach, with an emphasis on delivering a solution that's so easy-to-use and so powerful that it empowers clients to take control of the process.
